1. Summary

This is a mandatory section which must be up to 250 words long.

It should contain and highlight: The necessity of research, the importance of a thorough study to be carried out for the company or institution, a general objective and a brief description of the research methodology and expected results.

2. Scientific Problems

This is a mandatory section which must contain a problematic situation and a definition of the scientific problem.

3. Choose and develop an idea to defend, question scientifically or hypothesise.

Defended Idea: _____

Work Hypothesis: _____

Scientific Questions (Theoretical, Methodological and Results)... _____

4. Objectives

A mandatory section where the General Objective corresponds to what you would like to achieve with the Project; in most cases, the subject should simply be changed into the Infinitive. The Specific Objectives correspond to partial results or stages that lead to you fulfilling the General Objective. When using Scientific Questioning, objectives are not declared because these objectives adhere to tasks that have yet to be developed; which have to be described with nouns and not with verbs.

General Objective.

Specific Objectives: 1. Related to the State of Art and Practice (Theoretical). 2. Methodological relation to the Diagnosis. 3. Methodological relation to the Proposal. 4. With relation to the Practical Result.

1. _____
2. _____
3. _____
4. _____

5. REFERENCES

Mandatory section.

- Indicate at least 10 formal references including: books, technical or scientific articles, etc. This criterion can be made more flexible to meet Degree projects that involve recent technological issues and where formal references cannot be found.
- References and citations can be formulated under APA or Chicago regulations. You cannot combine these regulations.
- Only bibliographic references cited in the document should appear on the list.

6. The Budget

The Budget must be summarised and include only those items which are of relevance to the Project.

Item	Value
Materials and supplies	
Bibliographic material	
Transportation within the province	
Software licenses	
Contingencies	
External Consultancy	
Investment	

Pontificia Universidad Católica del Ecuador | Sede Ambato

7. Timeline: Describe all of the activities that will be carried out to develop the Degree Project or in the case of Postgraduates, the scientific articles.

Activities	Months					
	1	2	3	4	5	6

The months are accumulated starting from the signing of the approval of the Degree Project Plan.
